

## DUCKER RETRACTOR

GEN2 MEDICAL Ducker Retractors are manufactured in Germany by instrument makers with years of experience, utilizing the highest quality stainless steel and processes. **They were invented by Thomas Ducker, M.D.**, and are designed to be used during posterior cervical procedures and micro lumbar discectomies.

The Ducker Retractors **feature interdigitating blades that provide a very low profile for easy insertion.** The three toothed hook is **less traumatic** than sharp pointed hooks, that can tear tissue during insertion and removal. The hook also provides for a more stable hold that **reduces retractor body twisting.**

They are available in two lengths, both right and left.

### Ducker Retractors

Cat#	Description
G2N2223	DUCKER RETRACTOR 50x20mm LEFT
G2N2224	DUCKER RETRACTOR 50x20mm RIGHT
